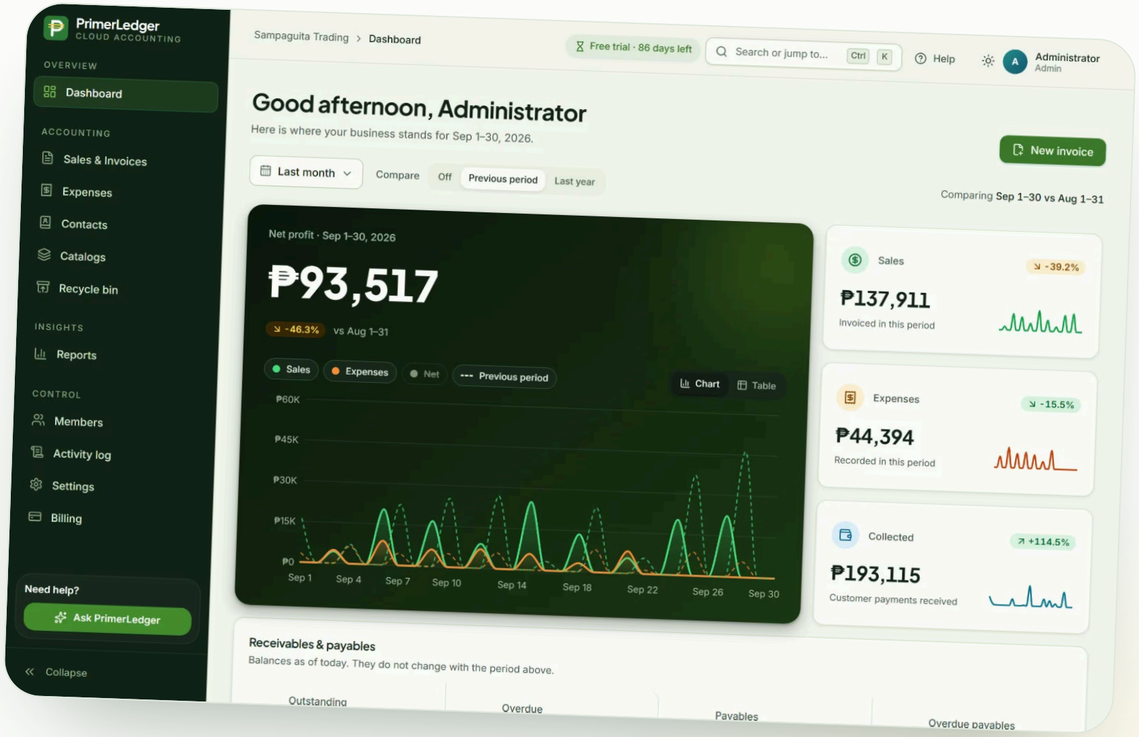
PrimerLedger

Easier than Excel. Clearer than a notebook.

Invoices, expenses, stock and reports for Philippine small businesses.

₱299 a month · 3 months free · no card needed



The books of a small business, after closing time.

1

Receipts in a box

Supplier bills and receipts are somewhere. The one you need is not.

2

Invoices in a notebook

Who paid, who paid half, who has not paid at all?

3

A spreadsheet that never adds up

One wrong formula and the month is off. Nobody knows since when.

“Saan napunta ang pera?” Where did the money go?

PrimerLedger keeps four columns for you.

Sell

Invoices with your TIN, logo and signature. Every payment recorded.

Spend

Expenses by category, with the receipt kept on the record.

See

Dashboard and reports that add themselves up.

Keep

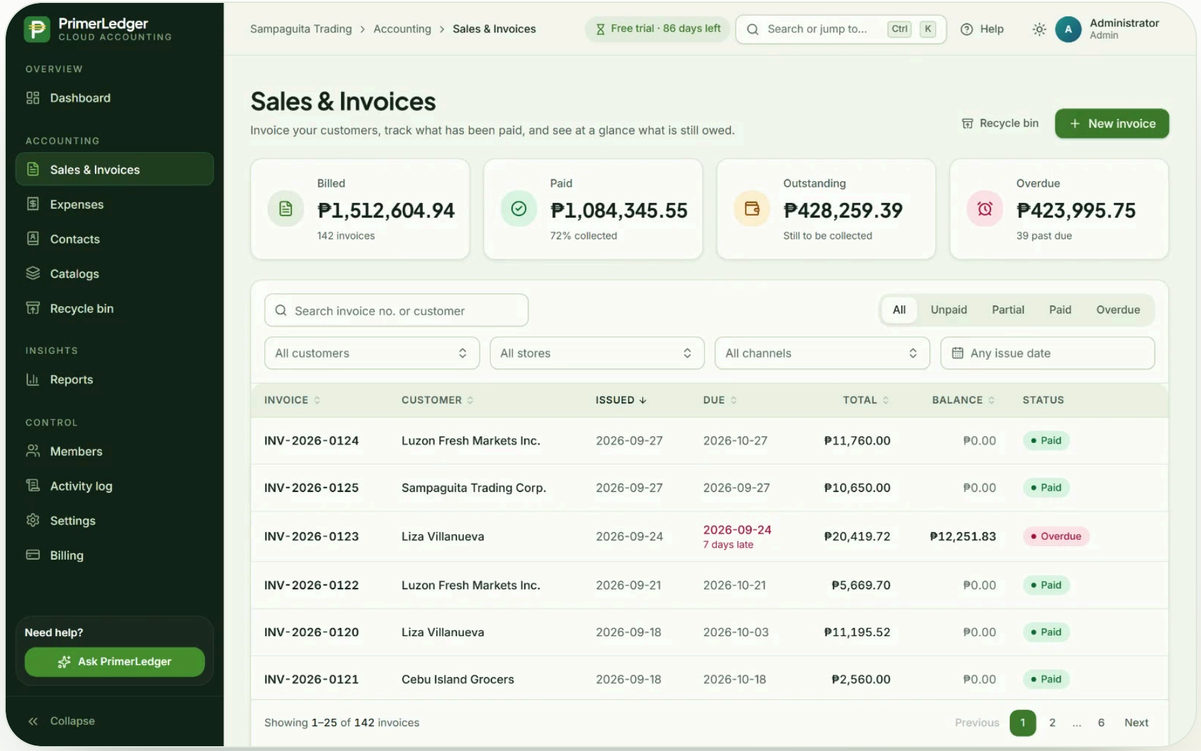
Roles, an activity log and a recycle bin. Nothing disappears.

SELL

An invoice in a minute. Every payment in its place.

Pick the customer, add the items, and download a PDF with your logo, TIN and signature.

- Partial payments: the balance is always right
- Overdue invoices are flagged for you
- Attach the PO or delivery receipt to the invoice
- Tag each sale by store or online channel

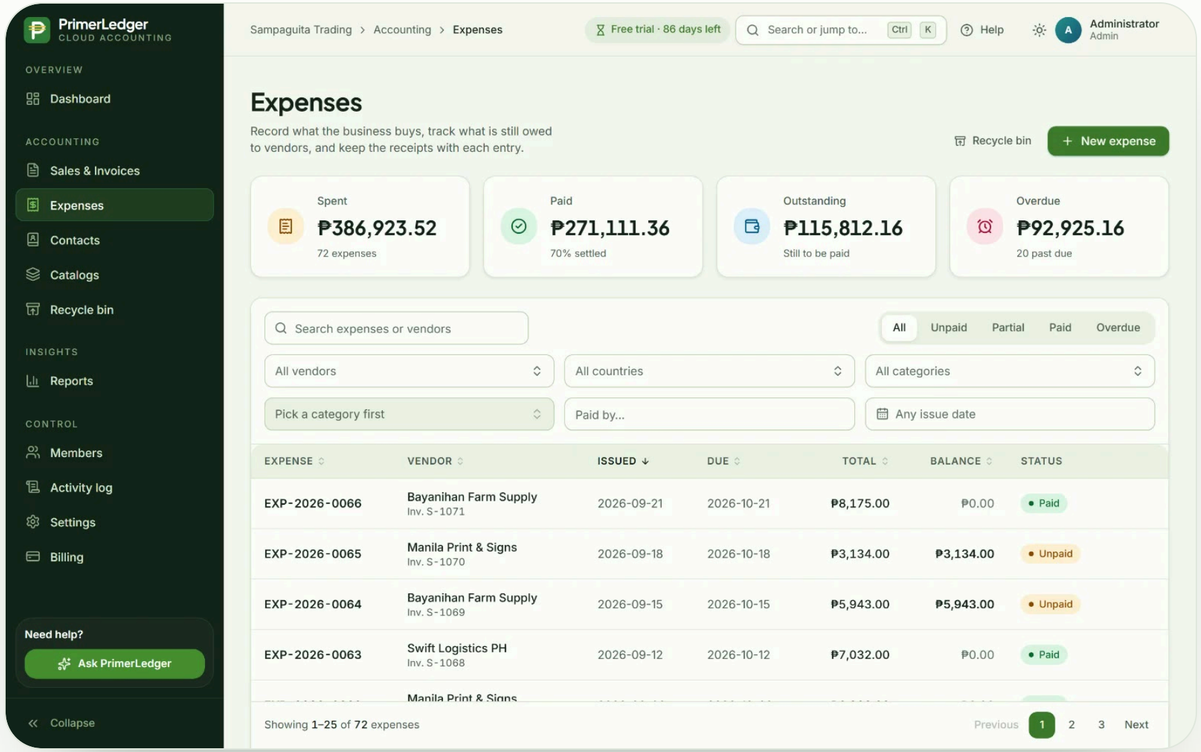


SPEND

Every expense, with its receipt.

Record supplier bills line by line, by category and subcategory, and upload the receipt or bill with it.

- Photo or PDF of the receipt kept on the record
- A warning before you record the same bill twice
- Suppliers and what you still owe them
- No more lost invoices

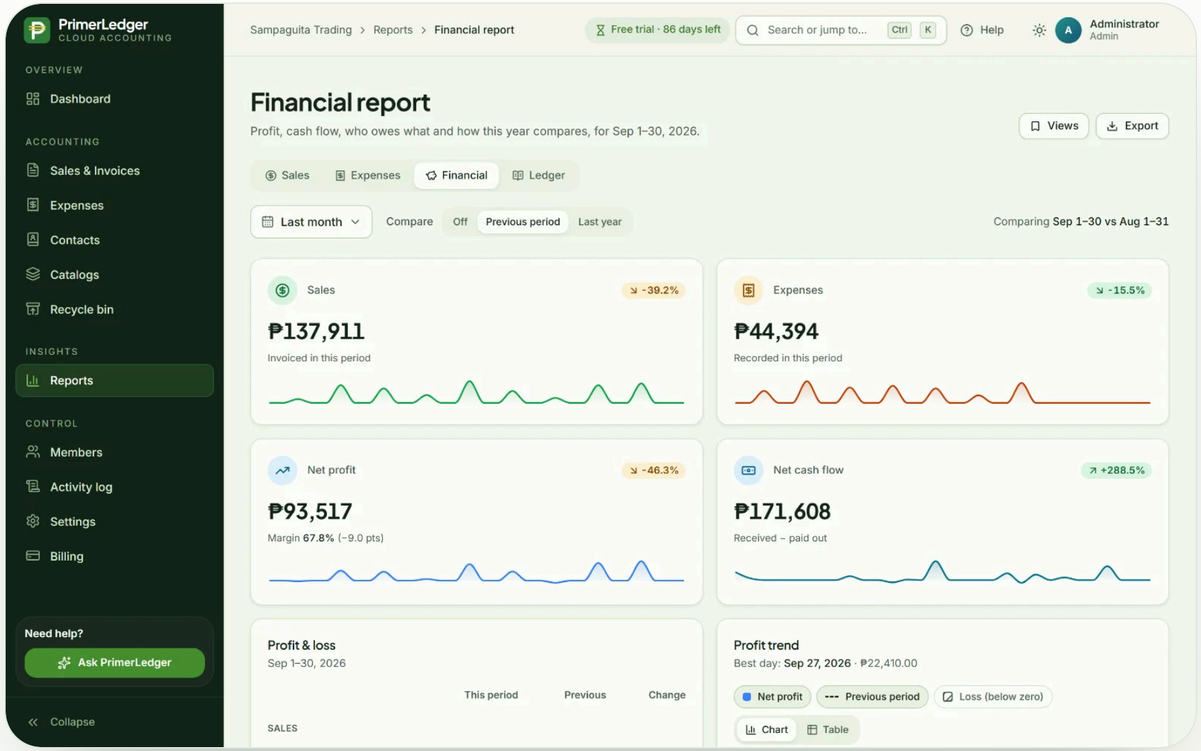


SEE

Know where the money went.

Sales, expenses and profit for the month, compared with last month, without a single formula.

- Click any bar to see the invoices behind it
- Profit and loss, cash in against cash out
- Aging: who is late, and by how much
- Compare with last period or last year

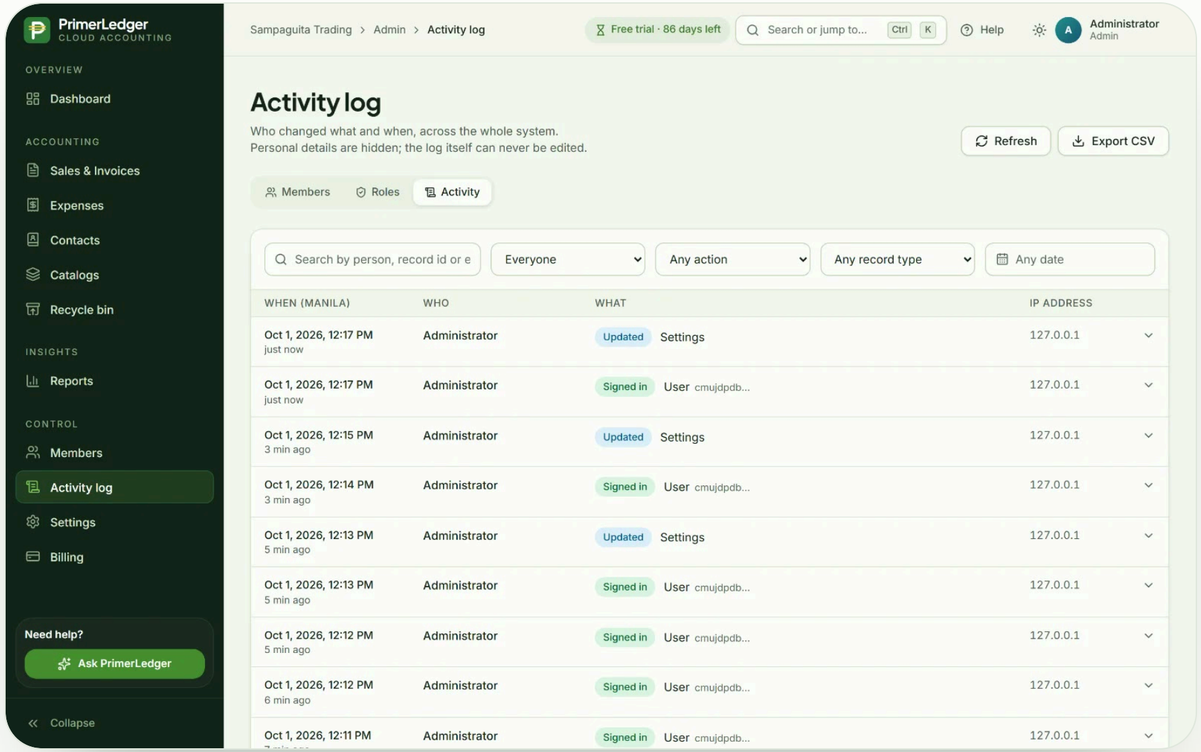


KEEP

Nothing disappears.

Invite your staff and your bookkeeper with the right role. Every change has a name and a time.

- Owner, Admin, Accountant and Viewer roles
- Activity log of every change
- Recycle bin: restore with one click
- Export everything, any time

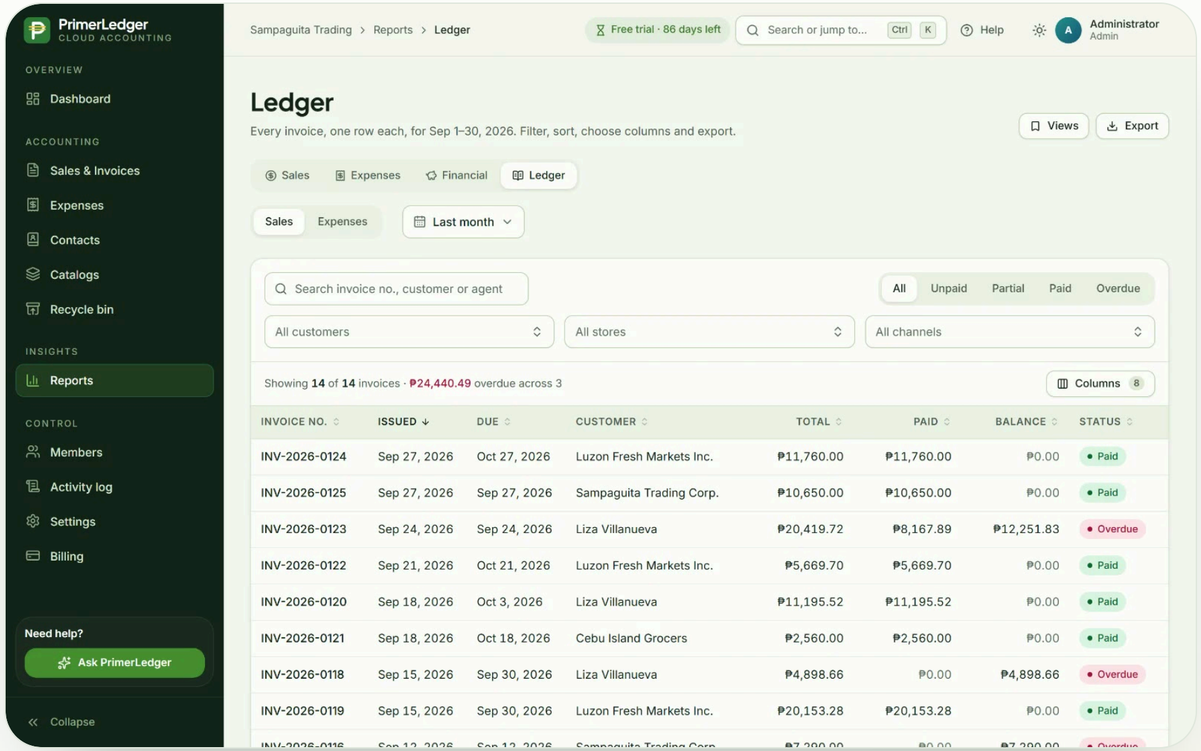


FROM EXCEL

Your spreadsheet, minus the formulas.

If you can keep a sheet in Excel, you can use PrimerLedger. And your accountant still gets Excel.

- Totals that add themselves up
- One ledger of invoices and expenses
- Choose the columns, filter the month
- Export to Excel, CSV or PDF in one click

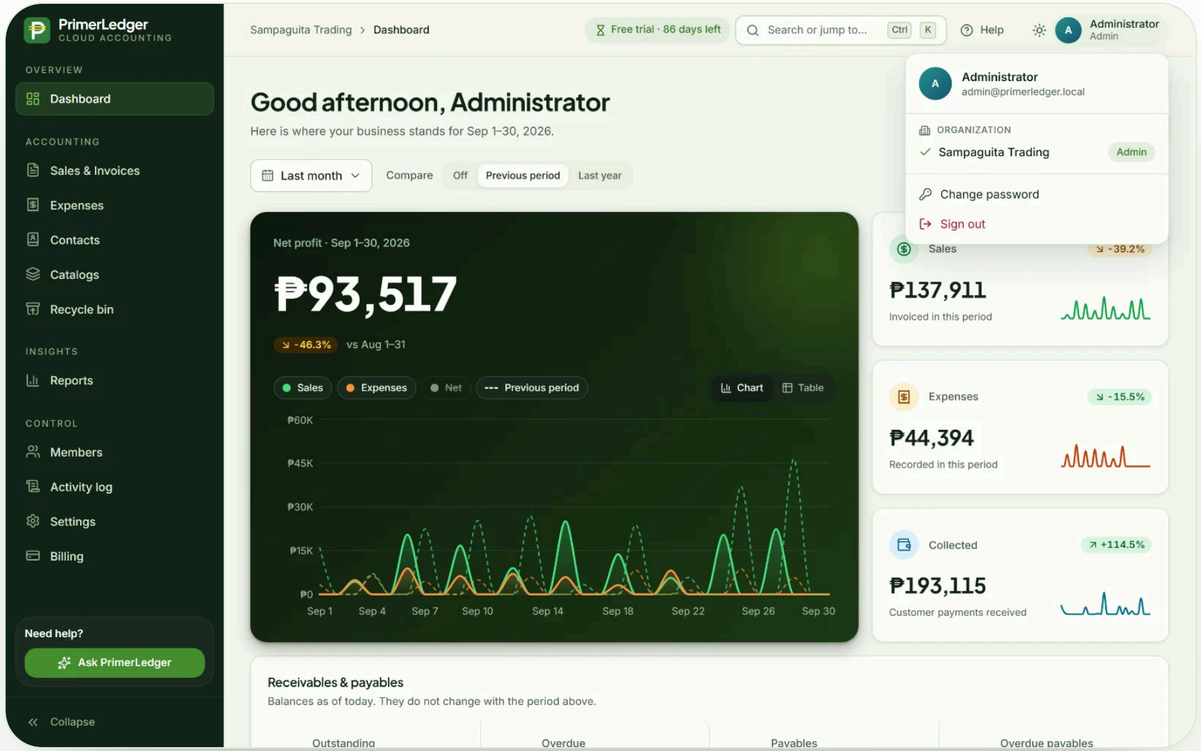


FOR ACCOUNTANTS

Every client in one place.

Keep the books for several businesses with one login, and switch between them without signing out.

- Your own Accountant role in each company
- The same reports for every client
- Exports your client can read
- Each company has its own plan and trial



Why not just a spreadsheet?

	PrimerLedger	A spreadsheet	A notebook
Invoice PDF with your TIN, logo and signature	**Included**	A template you build	Handwritten
Partial payments and balances	**Automatic**	By formula, if you build it	By hand
Overdue invoices	**Flagged for you**	You check	You check
Receipts kept with the expense	**Uploaded to the record**	A separate folder	A box
Warning before a double entry	**Included**	No	No
Profit and loss, aging	**One click**	If you build it	Ask your bookkeeper
Undo a delete, see who changed what	**Recycle bin and activity log**	Not reliably	No

One plan.
₱299 a month.

- Every feature, 3 months free
- No card needed to start
- Each company has its own plan
- Pay by bank transfer or GCash
- Stop any time: your records stay readable and exportable

3 months free. Every feature.

No card needed. Then ₱299 a month.
